

**Cultural Tips For The Successful Grower**

**Amity**

**Everbearing Red Raspberries**

**Amity** - Large firm, dark red berries with classic raspberry flavor and superior quality. Excellent for fresh market and the home gardener. Amity is good for fresh eating, freezing, and canning. Amity is also aphid resistant. Do not place in heavy, clay soils. Amity is a week or so earlier than Heritage but does not bear quite as heavily. Amity does not pick as well as Heritage because the berry sticks to the plug until quite ripe. We recommend Amity for the home gardener due to its excellent flavor. Zone 3-9

**Planting Instructions:** Amity can be planted in almost any sort of well-drained soil. Start by digging a large hole big enough to encompass all of the roots of the plant without bending or circling. Raspberries should be planted in the spring. They are usually spaced 2-3 feet in the row with 8-10 feet between the rows. Plant raspberries about one inch deeper than the plant grew in the nursery. The plant, as purchased from the nursery, may be cut back to a few inches as most of the growth will arise from the roots or from the base of the planted cane. Any white sprouts arising from the crown should be covered with soil to prevent burning by the sun.

Variety	Zone	Season	Size	Flavor	Classification	Exposure	Spacing
Amity	3-9 	 ↑ June - Frost	 Large	Classic Raspberry	Everbearing Raspberry	 Full Sun	2-3 Feet
