

Cultural Tips For The Successful Grower
Aromas

Aromas- Is a day-neutral cultivar which has larger fruit and produces greater yields than Selva or Seascape. Aromas produces large quantities of late-season fruit. It also has a broader environmental tolerance and is more resistant to mildew than Selva, and is especially tolerant to spider mites. Flavor is very good. Fruit size and cull rate is superior to Selva.

Planting Instructions: - In the home garden strawberries make an excellent ground cover. No soil preparation is necessary if the flower bed is mulched with bark dust, saw dust, etc. Simply dig the plant in leaving the crown exposed at ground level. Never plant strawberries to a depth where the crown is buried. Avoid wadding the roots in the planting hole.

Variety	Zone	Season	Size	Classification	Exposure	Flavor	Spacing
Aromas	5 -9 	 ↑ June-September	 Large	Everbearing Strawberry	Full Sun 	Very Good	1 Foot Apart in Rows
