

Cultural Tips For The Successful Grower

Bath

Bath: Introduced from the Geneva Station in New York in 1952. Medium sized, compact clusters. Round oval black berries. Tender fleshed, sweet and juicy. Fair quality. Vines seem to be as hardy as the Concord and very productive. Cluster thinning may be necessary to prevent overcropping. Ripens about three weeks before Concord. Zone 5-8

Planting Instructions: Grapes prefer a light soil with good drainage and moderate to high fertility. Soil should be kept moist the first year after planting, but the grapes will stand short dry periods in following years. A spring application of fertilizer (a balanced blend) is recommended. Plant grapes in early spring, pruning back top growth to two or three buds at planting time. Prune roots to avoid wadding of roots in planting hole. Grapes should be planted one inch deeper than plants grew in the nursery, and spaced eight feet APART for maximum performance.

Variety	Zone	Season	Size	Classification	Exposure	Flavor	Spacing
Bath	5-8 	 ↑ Late August	 Small-Medium	Seeded	Full Sun 	Pure, Mild, Clean	8-10 feet
