

**Cultural Tips For The Successful Grower
Camarosa**

Camarosa - We recommend this berry to our Southern customers. It is very worthy of trial in the Pacific Northwest because Camarosa is a huge berry of show quality and the flavor is good. Dishes are being dressed up with edible flowers, Camarosa would make a great centerpiece embellished with those flowers -- as would many of the small fruits! Chandler has done well as a fresh market berry in the Pacific Northwest and Camarosa shows the same potential.

Planting Instructions: - In the home garden strawberries make an excellent ground cover. No soil preparation is necessary if the flower bed is mulched with bark dust, saw dust, etc. Simply dig the plant in leaving the crown exposed at ground level. Never plant strawberries to a depth where the crown is buried. Avoid wadding the roots in the planting hole.
