

Cultural Tips For The Successful Grower
Hardyblue

Hardyblue Highbush; midseason. Medium size, very sweet, dark blue berries that are perfect for muffins and pancakes. Upright bush will grow to 4-6 feet at maturity. An established variety in the Pacific Northwest known for its heavy crops of superior flavored sweet berries. Adaptable to many soil types including heavier clay soils. Red fall colors. Zones 4-7

Planting Instructions: Highbush
Start with selecting a sunny location in well drained soil free of weeds and well worked. Locate in an area where irrigation water is available as best results will be obtained by keeping the root zone moist throughout the growing season. Where the soil is poor or marginally drained, raised beds 3-4 feet wide and 8-12" high work very well for blueberries. Blueberries can be planted as close as 2-1/2 feet apart to form solid hedgerows or spaced up to 6 feet apart and grown as individual specimens. If planted in rows, allow 8-10 feet between the rows depending on equipment used for mowing or cultivating.
Mulching - Blueberries do best with a 2-4" mulch over the roots to conserve moisture, prevent weeds and add organic matter. Bark mulch, sawdust, grass clippings, etc. all work well. Repeat every other year.

Variety	Zone	Season	Size	Classification	Exposure	Flavor	Spacing
Hardyblue	4-7 	 ↑ Midseason	 Medium	Northern Highbush	Full Sun 	Very Sweet	6 Feet
