

Cultural Tips For The Successful Grower
Heritage
Everbearing Red Raspberry

Heritage: Introduced from New York State at Geneva in 1969. Large, sweet, dark red berries with a mild flavor. This superior quality berry is good for fresh eating, freezing, canning, and preserves. The canes are tall for an everbearing raspberry, but are very sturdy and seldom require support. Strong, vigorous, very productive, suckers prolifically and spreads rapidly. Fairly tolerant of heavier soils but will develop Root Rot in poorly drained areas. Moderate summer crop with heavier, superior fall crop. An excellent variety for the home gardener and also grown commercially in many areas. Zone 4-9

Planting Instructions: Heritage can be planted in almost any sort of well-drained soil. Start by digging a large hole big enough to encompass all of the roots of the plant without bending or circling. Raspberries should be planted in the spring. They are usually spaced 2-3 feet in the row with 8-10 feet between the rows. Plant raspberries about one inch deeper than the plant grew in the nursery. The plant, as purchased from the nursery, may be cut back to a few inches as most of the growth will arise from the roots or from the base of the planted cane. Any white sprouts arising from the crown should be covered with soil to prevent burning by the sun.

Variety	Zone	Season	Size	Flavor	Classification	Exposure	Spacing
Heritage	4-9 	 July - Frost ↑	 Large	Mild Sweet	Everbearing Raspberry	 Full Sun	2-3 Feet
