

Cultural Tips For The Successful Grower
Himrod

Himrod: Introduced from the New York State Agricultural Experiment Station in 1952. American; Seedless. Long, large, loose clusters of medium size, oval, seedless golden yellow berries. Crisp skin, sweet and juicy flesh. Fine table quality. Used for juice. Has a pure, sweet, delicate flavor. Also makes excellent raisins. Moderate disease resistance. Ripens about 25 days before Concord. Fairly hardy. Zone 5-8

Fort Hells Nurseries

Planting Instructions: Grapes prefer a light soil with good drainage and moderate to high fertility. Soil should be kept moist the first year after planting, but the grapes will stand short dry periods in following years. A spring application of fertilizer (a balanced blend) is recommended. Plant grapes in early spring, pruning back top growth to two or three buds at planting time. Prune roots to avoid wadding of roots in planting hole. Grapes should be planted one inch deeper than plants grew in the nursery, and spaced eight feet APART for maximum performance.

Variety	Zone	Season	Size	Classification	Exposure	Flavor	Spacing
Himrod	5-8 	 ↑ Late August	 Medium	Seedless	Full Sun 	Pure, Sweet, Delicate	8-10 feet
