

Cultural Tips For The Successful Grower Honeoye

Honeoye - Introduced by the Geneva Station in 1979. Large, conic, bright red fruit with average firmness and above average quality. Flavor is tart but good. Excellent berry for freezing. High yields and a long fruiting season make this a popular commercial variety. Also excellent for pick your own operation and home gardeners. This variety is very winter hardy and vigorous. No resistance to soil diseases and susceptible to Verticillium and Red Stele. Tolerant of Leaf Spot, Leaf Scorch, and Fruit Rot. May develop off-flavor on heavy clay soils.

Planting Instructions: - In the home garden strawberries make an excellent ground cover. No soil preparation is necessary if the flower bed is mulched with bark dust, saw dust, etc. Simply dig the plant in leaving the crown exposed at ground level. Never plant strawberries to a depth where the crown is buried. Avoid wadding the roots in the planting hole.

Variety	Zone	Season	Size	Classification	Exposure	Flavor	Spacing
Honeoye	5-8 	 ↑ Early June	 Large	Spring Crop Strawberry	Full Sun 	Tart	1 Foot Apart In Rows
