

Cultural Tips For The Successful Grower Hood

Hood - Released in 1965 from Oregon State University. The large round (Globose) berry is considered to have the best table quality, now that the old Marshall (Vintage 1912) is no longer being propagated. Hood is known best as a fine preserve and jam berry, and is good for all other uses. Resistant to Root Rot, Mildew, and Red Stele but is quite susceptible to virus and should not be planted near strawberries known to be virused. Bears entire crop over a short period. Popular home garden variety. Not particularly winter hardy.

Planting Instructions: - In the home garden strawberries make an excellent ground cover. No soil preparation is necessary if the flower bed is mulched with bark dust, saw dust, etc. Simply dig the plant in leaving the crown exposed at ground level. Never plant strawberries to a depth where the crown is buried. Avoid wadding the roots in the planting hole.
