

Cultural Tips For The Successful Grower
McC Campbell

McC Campbell: Introduced in 1961. McC Campbell is a bud sport of Fredonia. Clusters are very large, 3 to 4 times as large as Fredonia. Similar to Fredonia in all other respects. Bluish black berries, sweet and juicy. Needs good fertility for consistent quality and cluster size. Ripens midseason. Zone 5-9

Planting Instructions: Grapes prefer a light soil with good drainage and moderate to high fertility. Soil should be kept moist the first year after planting, but the grapes will stand short dry periods in following years. A spring application of fertilizer (a balanced blend) is recommended. Plant grapes in early spring, pruning back top growth to two or three buds at planting time. Prune roots to avoid wadding of roots in planting hole. Grapes should be planted one inch deeper than plants grew in the nursery, and spaced eight feet APART for maximum performance.

Variety	Zone	Season	Size	Classification	Exposure	Flavor	Spacing
McC Campbell	5-9 	 Mid-Season	 Very Large	Seeded	Full Sun 	Sweet	8-10 feet
