

Cultural Tips For The Successful Grower

Munger Black Raspberry

Munger- (Black Raspberry) Developed in Ohio, Munger is a midseason bearer. Large, plump yet firm, shiny black berries that are not seedy. Munger has a delicious, sweet flavor that is excellent for jam, jellies, and preserves. Only satisfactory for freezing. Munger has stout canes that appear to be more resistant to Fungal Diseases than other raspberry varieties. Munger is the leading variety in the Pacific Northwest, commercially and in the home garden. Very hardy. Zone 5-8

Planting Instructions: One year old tip plants should be planted in March or April. Two year old transplants may be planted earlier, one inch deeper than the plant grew in the nursery. Any white sprouts arising from the crown should be covered with soil to prevent burning by the sun. The older stems or tops on transplants may be cut back several inches. Blackcaps should be spaced 3-4 feet in the row and 6-8 feet between rows.

Variety	Zone	Season	Size	Flavor	Classification	Exposure	Spacing
Munger	5-8 	 ↑ Early-Mid	 Large	Sweet	Black Raspberry	Full Sun 	3-4' in row
