

## Cultural Tips For The Successful Grower Price

**Price:** Introduced from Virginia in 1973. American. Small compact cluster of medium size, bluish black berries. Flavor is sweet and pure, lacking any of the American foxiness. Good quality. Good as table grape and for juice. Can be tried for wine. Ripens about 21 days before Concord. Excellent variety for cooler areas of the Pacific Northwest. Hardy to approximately -10 degrees F. Zone 6-9

**Planting Instructions:** Grapes prefer a light soil with good drainage and moderate to high fertility. Soil should be kept moist the first year after planting, but the grapes will stand short dry periods in following years. A spring application of fertilizer (a balanced blend) is recommended. Plant grapes in early spring, pruning back top growth to two or three buds at planting time. Prune roots to avoid wadding of roots in planting hole. Grapes should be planted one inch deeper than plants grew in the nursery, and spaced eight feet APART for maximum performance.

Variety	Zone	Season	Size	Classification	Exposure	Flavor	Spacing
Price	6-9 	 ↑ Late August	 Medium	Seeded	Full Sun 	Sweet, Pure, Lacks Foxy Flavor	8-10 feet
