

Cultural Tips For The Successful Grower Tri Star

Tri Star - Developed at the University of Maryland and released in 1982. Similar to Tribute but much sweeter and more aromatic. Produces a heavy, very early spring crop of small to medium short conic fruit. Cool fall weather will bring larger, more elongated fruit. Fall crop is the heaviest. Berries have firm, glossy, deep red skin with solid, medium red flesh. Fresh fruit flavor is excellent. Also recommended for freezing. Medium size plants with moderate number of runners which will bloom and bear fruit before rooted. This is a good variety for hanging baskets. Resistant to Red Stele and Verticillium Wilt. Tolerant of Leaf Scorch and Leaf Blight. Well adapted to upland areas in the south and mild areas in the East and the Pacific Northwest. Hardy in zones 5 - 8.

Planting Instructions: - In the home garden strawberries make an excellent ground cover. No soil preparation is necessary if the flower bed is mulched with bark dust, saw dust, etc. Simply dig the plant in leaving the crown exposed at ground level. Never plant strawberries to a depth where the crown is buried. Avoid wadding the roots in the planting hole.

Variety	Zone	Season	Size	Classification	Exposure	Flavor	Spacing
Tristar	5-8 	 June-September	 Medium	Everbearing Strawberry	Full Sun 	Sweet	1 Foot Apart In Rows
